Dear DWR Staff:

On behalf of Pasadena Water and Power (PWP), we want to thank you for the draft award recommendation for our Water and Energy Direct Install Program (WeDIP) Expansion project.

In regards to comments on how best to utilize funds to meet monitoring requirements, PWP's preference would be for Option 1: Utilize an existing DWR-University of California contract to have the University conduct third-party monitoring on the effectiveness of projects funded by the Water-Energy Grant Program.

If you should have any questions, please don't hesitate to contact me, or Ursula Schmidt, PWP Water Conservation Manager, 626-744-3865.

Sincerely,

Andrea Owen
